

Colleague Tooling Lab · Colleague & Customer Service

**The right tool and the right answer in front of every colleague,
first time.**

The Lab builds and runs the tools colleagues use every day: the case and claims workspaces, the knowledge they look things up in, and the desktop that holds it all together.

Across the Lab

Teams in the Lab

All teams in the Lab

The diagram illustrates three interconnected components of a system, each represented by a blue icon (a stylized 'S' or 'G' shape) and a title. Below each title is a descriptive sentence and a count of people and tools.

- Case Tools**: The case and claims workspaces colleagues work in all day. 19 people · 14 tools
- Knowledge**: Answers and guidance at the point of need, kept current. 12 people · 9,800 articles
- Desktop**: The colleague desktop and the integrations between its tools. 13 people · 18 tools

The programme

The diagram illustrates the progress of various tasks across four categories: Sense 1, Understand 2, Act 2, and Prove 1. Each category has a list of tasks with their current status indicated by a colored box.

Category	Task	Status
Sense 1	Desktop analytics	Working
Understand 2	Journey walkthroughs	Working
	Search failure analysis	Building
Act 2	Case summary panel	Building
	One sign-in	Assessing
Prove 1	Time-to-answer tracking	Working

How every team in the Lab works

Designed with colleagues

No tool goes live without being tested by the people who will use it.

One place for each answer

Every answer lives in one article, linked from every tool that needs it.

Fewer clicks every release

Each release removes steps; none adds them without a reason.

Three teams, one Lab.

Each team owns its own work, people and numbers. The Lab sets how every team works and runs one programme across them.

Case Tools

Trust and controls

How we count value

The programme: what every team in the Lab is working on.

Sense 1	Understand 2	Act 2	Prove 1
Desktop analytics Shows where colleagues switch between tools most, anonymously. Desktop Working	Journey walkthroughs Sitting with colleagues through a real case, start to finish. Case Tools Working	Case summary panel The facts of a claim on one panel, so handlers stop opening five screens. Case Tools Building	Time-to-answer tracking How long it takes a colleague to find an answer, measured every week. Knowledge Working
	Search failure analysis Finds the questions colleagues search for and don't find answers to. Knowledge Building	One sign-in One sign-in for every colleague tool at the start of the day. Desktop Assessing

Colleague Tooling Lab

The tools we use and the skills we bring.

The tools every team in the Colleague Tooling Lab uses, and the skills behind them. This is the platform Tools list filtered to this Lab; the full list is on CCS.

Tools

Every tool across CCS

Tool	Vendor	What we use it for	Status	Licence owner
Power Platform	Microsoft	Apps, workflows and Copilot Studio	Live	Technology Platform Lead
Pega	Pegasystems	Case and claims workspaces	Live	Lab Engineering Lead, Colleague Tooling
ServiceNow	ServiceNow	Incidents, knowledge and service requests	Live	Lab Engineering Lead, 24x7 Services
Azure DevOps	Microsoft	Code, pipelines and releases	Live	Technology Platform Lead
Microsoft 365	Microsoft	SharePoint, Teams and these sites	Live	Business Platform Lead

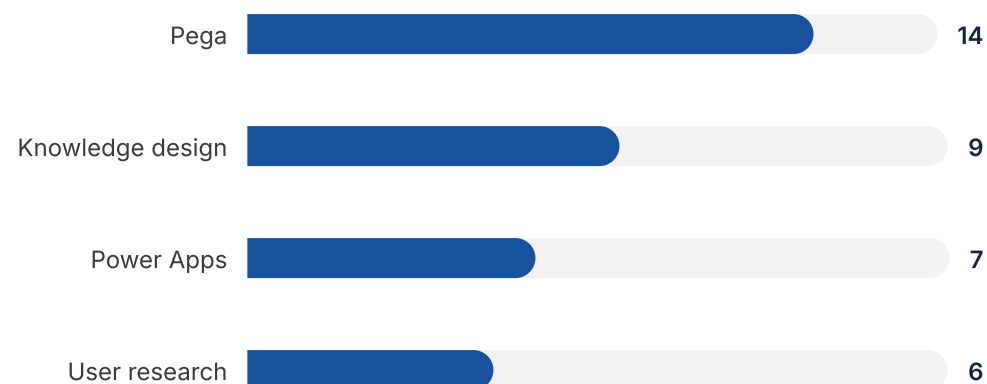

Skills in the Lab

We grow skills on the Dreyfus scale: Novice, Advanced beginner, Competent, Proficient, Expert. Competent is the baseline for anything we put live; the chart shows how many people are Proficient or Expert in each skill.

Each team's full picture, including who is learning what, is on its private team site.

People at Proficient or Expert

By skill, across every team in the Lab

Microsoft Power BI

Colleague Tooling Lab

How every team in the Lab works.

Three rules every team in the Lab follows, with the evidence we keep and how we check.

1 Designed with colleagues

No tool goes live without being tested by the people who will use it, on real work.

Evidence we keep	How we check
Usability test notes for every release.	Release checklist; no sign-off without colleague testing.

2 One place for each answer

Every answer lives in one knowledge article, linked from every tool that needs it.

Evidence we keep	How we check
Article ownership and review dates.	Quarterly duplicate-article check.

3 Fewer clicks every release

Each release removes steps for colleagues; none adds steps without a stated reason.

Evidence we keep	How we check
Before-and-after click counts for the main journeys.	Design review for every release.
