

Data & Insights Lab · Colleague & Customer Service

# One trusted set of numbers behind every decision on the platform.

The Lab owns the data and reporting behind CCS, including the value figures on every CCS site. If a number appears on this platform, it comes from here.

## How every team in the Lab works

One source for each number

Every figure on a CCS site comes from the CCS estate model, never a spreadsheet.

Agreed with Finance

Value and cost definitions are signed off before they are shown.

Show the date

Every visual says when its data was last refreshed.

## Who leads the Lab

PO

[Name]

Lab Product Owner · priorities, programme and value

EL

## Tools

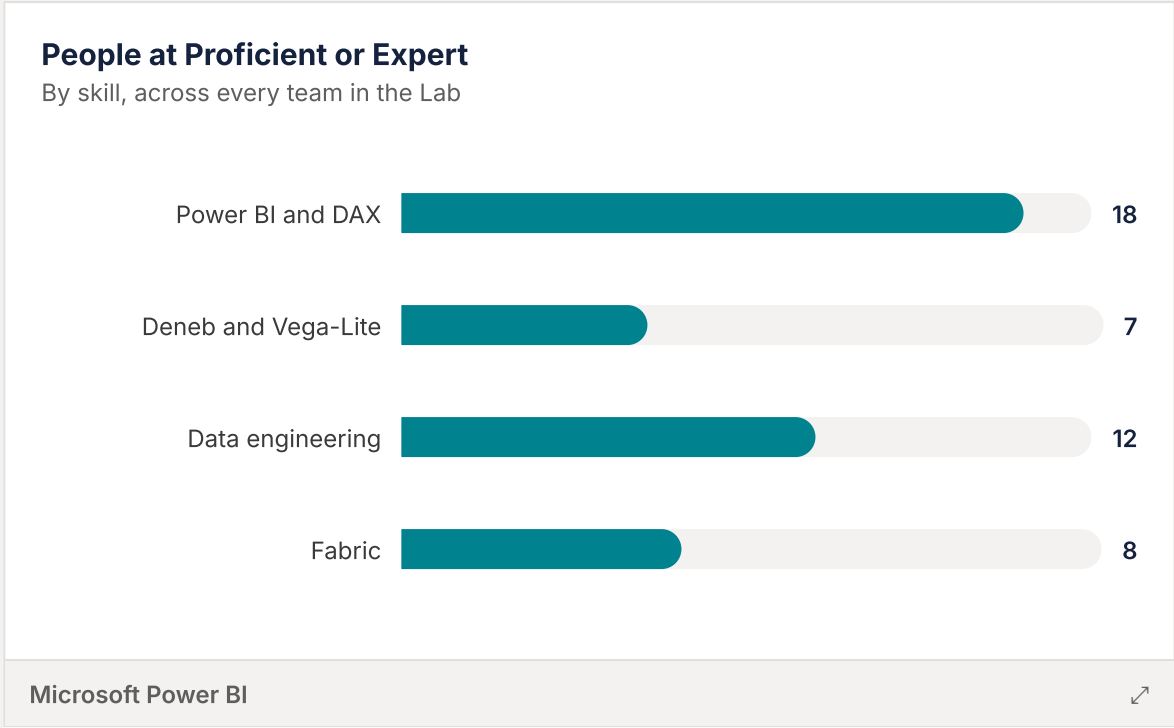

## Every tool across CCS

| Tool                | Vendor                        | What we use it for                       | Status | Licence owner                         |
|---------------------|-------------------------------|------------------------------------------|--------|---------------------------------------|
| Google Cloud        | Google                        | Agents, workflows and reusable services  | Pilot  | Technology Platform Lead              |
| Azure DevOps        | Microsoft                     | Code, pipelines and releases             | Live   | Technology Platform Lead              |
| Power BI and Fabric | Microsoft                     | The CCS estate model and every dashboard | Live   | Lab Engineering Lead, Data & Insights |
| Deneb               | Open source, certified visual | The charts in every CCS report           | Live   | Lab Engineering Lead, Data & Insights |
| Microsoft 365       | Microsoft                     | SharePoint, Teams and these sites        | Live   | Business Platform Lead                |

## Skills in the Lab

We grow skills on the Dreyfus scale: Novice, Advanced beginner, Competent, Proficient, Expert. Competent is the baseline for anything we put live; the chart shows how many people are Proficient or Expert in each skill.

Each team's full picture, including who is learning what, is on its private team site.

Three rules every team in the Lab follows, with the evidence we keep and how we check.

## 1 One source for each number

Every figure on a CCS site comes from the CCS estate model, never a spreadsheet or a copy.

| Evidence we keep                                         | How we check                                          |
|----------------------------------------------------------|-------------------------------------------------------|
| The model's lineage: every measure traced to its source. | Report reviews reject visuals built on other sources. |

## 2 Agreed with Finance

Value and cost definitions are signed off with Finance before they are shown anywhere.

| Evidence we keep                              | How we check                         |
|-----------------------------------------------|--------------------------------------|
| Signed-off definitions on How we count value. | Monthly reconciliation with Finance. |

### 3 Show the date

Every visual says when its data was last refreshed, so nobody acts on stale numbers.

| Evidence we keep                   | How we check                                    |
|------------------------------------|-------------------------------------------------|
| Refresh history for every dataset. | Daily refresh monitor; failures alert by 06:15. |
