

Build spec

Everything on the two sites is a standard SharePoint web part. Turn on "showLabels" in Tweaks on any page to see which web part builds each block. Layout widths are Microsoft's published column widths at 1366 × 768.

Palette: LBG theme colours and tonal alternatives

Crimson (primary)	#F6D5DC	#ECA6B5	#E2728B	#CE143D	#A11030	#770C23	Buttons, links, cards, the Automated Operations colourway; #470C1E for the Lab title ground
Navy (structure)	#D8DCE4	#ACB5C7	#7C89A6	#243B6B	#1C2E53	#15223E	Footer, hero ground, the Cs of the mark, secondary chart series
Gold (single highlight)	#F5EAD1	#EAD29E	#DFB866	#C98900	#9D6B00	#754F00	"Next" and "being built" states only
Status pills	#E3F1DF	#39682E	#DDE3EF	#273860	#F6DFD5	#6B3415	Live or done (green), in progress (blue), long-build (orange): light fill, dark text from the same family

What Brand Center controls, and what you control

Element	Controlled by	How it carries the brand
Site theme colours (buttons, links, strong sections)	Brand Center	Pick the closest published theme. The design only relies on the theme for buttons, links and the one strong section.
Fonts	Brand Center font package	Whatever the package sets. The mockups use Segoe UI so nothing depends on a custom font.
Header background, title area and hero images	You (site settings and pages)	Navy and crimson images carry the look regardless of theme.
Card grids and pills	You (list formatting JSON)	Colours are fixed in the JSON, so they hold under any theme.
Charts and KPI strips	You (Power BI theme JSON)	Applied to each report.
Site logo and footer logo	You (Change the look)	The CCS mark: Automated Operations colours on the site, platform colours in the footer.

Images

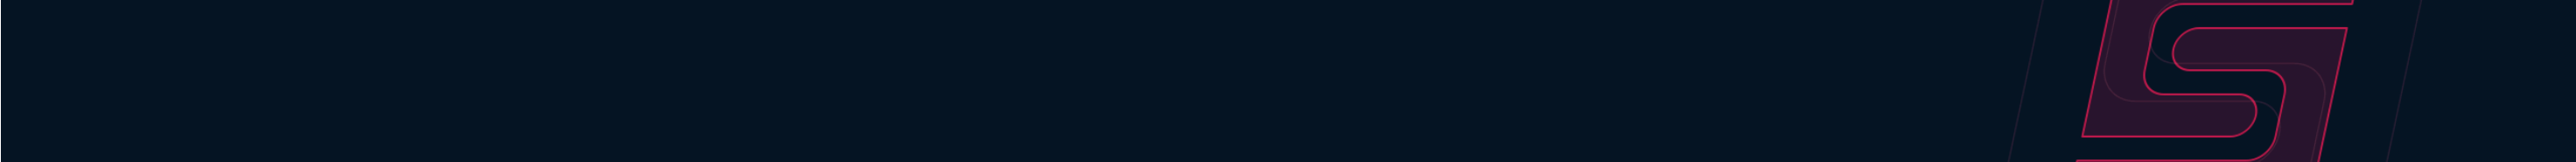

Hero and title area, navy
2560 × 1440 · 16:9
Home title area (Image layout) and news thumbnails. Other pages use the Plain layout.
SharePoint crops to a wide band: keep detail in the middle 50%.

Title area, Lab
2560 × 1440 · 16:9
The Lab title area (Image layout) and news thumbnails for Lab stories.

Title area, light
2560 × 1440 · 16:9
News thumbnails.

Header background
2560 × 164
Optional: only if you switch the header to Extended. The design uses Compact.

Customer channels	Web, app, telephony, post	
Journey layer	Hero journeys: where what we build is used	
Agents and automations	Where we build: Blue Prism digital workers, Power Platform, agents on Google Cloud	
Platform services	Where we build: workflows and reusable services on Google Cloud	
Enterprise platforms	Dataverse, ServiceNow and other shared platforms	
Core systems	Wealth and insurance policy administration	

Where we fit · 2408 × 940
Image web part, one column, What we can do page. Alt text supplied in the build pack.

Lab family strip · 2408 × 240
Image web part, last section of Our people. Replaces a footer row SharePoint can't hold.

Logos and marks

The CCS mark: two Cs (Colleague, Customer) stay navy, the S carries the colour. Business site logo: Automated Operations colours, 300 × 300 and 64 × 64. Team site logo: the dark version on a navy square. Footer and hub: platform colours. Each lab uses its own colours.

Section layouts at 1366 × 768

One column	1204
Two columns	586 586
Three columns	380 380 380
One-third left	380 790
Team site, one column	about 1020 with left navigation

The front door model

Four intents replace the six robot-specific routes, for every solution type. One Requests list holds all four as content types, linked to the Solutions catalogue. Urgent live incidents go to ServiceNow, never the list.

Intent	Replaces	Content type fields	Routes to
Ask a question	Ask a question about a robot	Solution, Details	Service Team lead
Report a problem	Raise a bug	Solution, What happened, Impact, Started	Service Team (urgent: ServiceNow incident)
Change something	Raise a change request, Schedule change, Impact assessment	Solution, Change type (what it does / when it runs / a system it uses is changing), Details	Service Team; impact assessments to the Lead Solution Architect
Bring us something new	Raise a new opportunity	Business area, Monthly volume, Minutes per case, What hurts	Product Owner (Qualified gate)

Lab site standard (for every lab under the CCS hub)

Same on every lab site	Each lab sets its own
Hub association and hub navigation; page set (Home, What we deliver, Our people, What we can do, Trust and controls, Contact us); the four-intent front door with Requests and Solutions lists; KPI strip, data-as-at line and definitions; footer; section rhythm and web part choices; launch checks	Lab colourway of the CCS mark, and the lab colour in the images and card JSON; header and title-area images; list content; the lab-specific page (ours: The Lab); people and quotes
When the platform front door launches, each lab's Contact us routes link into it with the lab preselected; Your requests then reads from the platform list instead.	

Lists and where they appear

List	Site	Shown on	View and formatting file
Capabilities	Business	Home (Featured view), What we can do (All)	gallery: tile-capabilities.json
Skills	Business	Our people	gallery: tile-skills.json
Stories	Business	What we deliver	gallery: tile-stories.json
Quotes	Business	Our people	gallery: tile-quotes.json
Platforms	Business	What we can do	gallery: tile-platforms.json
LabItems	Business	The Lab	gallery: tile-labitems.json
Requests (4 content types)	Business	Contact us (My requests); team Triage view	columns: col-requeststatus.json; form header: form-requests.json
Solutions	Business	What we deliver (Live in each area); Requests lookup	column: col-solutiontype.json
Portfolio	Team	Delivery	columns: col-shape.json, col-size.json, col-gate.json
LabInvestigations	Team	Delivery (grouped by Stage)	column: col-labstate.json
ToilLedger	Team	Service	columns: col-size.json, col-toilstatus.json
Learning, CapabilityGaps	Team	Capability	standard list view
